## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 97 - 150, drawn to a method and system for determining if a first agent should service a first work type in a work processing facility, classified in class 379, subclass 265.13.
- II. Claims 151 - 164, drawn to a contact center, classified in class 379, subclass 309. In addition, search would have to be preformed in classes 705 and 709.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are a contact center which determines and selects a state of the contact center among a plurality of differing contact centers states, while the Invention of Group I is a method to determine if an agent should service a work item of a first work type.
